

Disaster Proof Your Payroll

Are you prepared to pay your employees throughout the COVID-19 pandemic or in the event of a natural disaster? Let us help with the Fintwist® Mastercard® Digital Payment Solution.

Steps to Prepare Your Payroll for a Pandemic or Natural Disaster:

- 1 Switch to 100% electronic payroll.** We can't anticipate the unexpected. If you employ workers who don't have bank accounts, contact us to get your business to 100% electronic pay using payroll cards. Your employees will be able to get paid via a payroll card which is funded by you just like direct deposit, giving them security that drives loyalty.
- 2 Set up a payroll contingency plan for emergencies.** To start, this should include setting up your payroll system on a laptop and training a trusted backup employee on how to run payroll in the event that your organization can't.
- 3 Plan to process payroll early if you're anticipating a disaster.** Paying employees early may provide the grace period that they need to withdraw money in a timely manner before it's too late.
